Sea Harvest

EXPORT CATALOGUE

Sea Harvest is one of the largest Cape Hake producers in Southern Africa, with an extensive range of products, which are caught and produced by the Sea Harvest fleet and factories, includes natural cuts such as skinless and skin-on fillets, IQF loins, moulded portions and a range of value-added products packed for both the retail and foodservice markets.

The most popular by-catch species, such as Monkfish, Kingklip, Angelfish, John Dory and Ribbonfish are also processed in Sea Harvest's factories and packed in various formats based on customer requirements.

Frozen-at-Sea production aboard Sea Harvest's freezer vessels ensures that products are prepared and processed within hours of being caught to maintain the best texture and taste in the products. Skinless sea-frozen fillets are frozen on board and marketed in the Cape Haddie and High Seas brands. An extension of the sea-frozen products include whole-round Cape Hake (HG&T) and a variety of high value by-catch species.

All Sea Harvest Cape Hake products – whether frozen at sea or frozen on land – are single frozen from fresh catches and are 100% natural with zero additives, produced from a certified sustainable source.

PROUDLY PART OF
THE SEA HARVEST GROUP

Sea Harvest

Sea Harvest Australia is a vertically integrated agribusiness headquartered in Fremantle, Western Australia. Our world class fisheries are MSC sustainably certified, and are renowned for their coral reefs, long sea grass, high salinity waters. These attributes add a natural sweetness to our products and give them flavours that are unique to any other wild-caught fisheries globally.
